

## **Technical data sheet**

TFX24

Customizable Fail-Safe actuator for controlling dampers in typical commercial HVAC applications.

- Torque motor 22 in-lb [2.5 Nm]
- Nominal voltage AC/DC 24 V
- Control On/Off

## **Technical data**

| Electrical data | Nominal voltage   | AC/DC 24 V  |
|-----------------|---|---|
|                 | Nominal voltage frequency   | 50/60 Hz  |
|                 | Nominal voltage range   | AC 19.228.8 V / DC 21.628.8 V   |
|                 | Power consumption in operation  | 2 W   |
|                 | Power consumption in rest position  | 1.3 W   |
|                 | Transformer sizing  | 5 VA  |
|                 | Electrical Connection   | 18 GA appliance or plenum cables, 1 m, 3 m or 5 m, with or without 1/2" conduit connector   |
|                 | Overload Protection   | electronic throughout 095° rotation   |
|                 | Electrical Protection   | actuators are double insulated  |
| Functional data | Torque motor  | 22 in-lb [2.5 Nm]   |
|                 | Direction of motion motor   | selectable by ccw/cw mounting   |
|                 | Direction of motion fail-safe   | reversible with cw/ccw mounting   |
|                 | Angle of rotation   | Max. 95°  |
|                 | Angle of rotation note  | adjustable with mechanical stop   |
|                 | Running Time (Motor)  | 75 s  |
|                 | Running time fail-safe  | <25 s @ -4122°F [-2050°C], <60 s @ -22°F<br>[-30°C]   |
|                 | Noise level, motor  | 50 dB(A)  |
|                 | Noise level, fail-safe  | 62 dB(A)  |

| Product features      |   |
|-----------------------|---|
| Application           | For On/Off, fail-safe control of dampers in HVAC systems. Actuator sizing should be done in accordance with the damper manufacturer's specifications. Control is On/Off from an auxiliary contact, or a manual switch. The actuator is mounted directly to a damper shaft from 1/4" up to 1/2" in diameter by means of its universal clamp, 1/2" shaft centered at delivery. A crank arm and several mounting brackets are available for applications where the actuator cannot be direct coupled to the damper shaft.  |
| Operation             | The TF series actuators provide true spring return operation for reliable fail-safe application and positive close off on air tight dampers. The spring return system provides consistent torque to the damper with, and without, power applied to the actuator. The TF series provides 95° of rotation and is provided with a graduated position indicator showing 0° to 90°. The actuator may be stalled anywhere in its normal rotation without the need of mechanical end switches. Power consumption is reduced in holding mode.<br>Safety Note: Screw a conduit fitting into the actuator's bushing. Jacket the actuator's input and output wiring with suitable flexible conduit. Properly terminate the conduit in a suitable |
| Typical specification | junction box.<br>On/Off spring return damper actuators shall be direct coupled type which require no crank arm<br>and linkage and be capable of direct mounting to a shaft up to a 1/2" diameter and center a 1/2"  |
|                       | shaft. The actuators must be designed so that they may be used for either clockwise or counter<br>clockwise fail-safe operation. Actuators shall be protected from overload at all angles of<br>rotation. If required, one SPDT auxiliary switch shall be provided having the capability of being<br>adjustable. Actuators with auxiliary switch must be constructed to meet the requirements for<br>Double Insulation so an electrical ground is not required to meet agency listings. Actuators shall<br>be cULus listed, have a 5 year warranty, and be manufactured under ISO 9001 International<br>Quality Control Standards. Actuators shall be as manufactured by Belimo.  |

**Electrical installation** 

## Marning! Live electrical components!

During installation, testing, servicing and troubleshooting of this product, it may be necessary to work with live electrical components. Have a qualified licensed electrician or other individual who has been properly trained in handling live electrical components perform these tasks. Failure to follow all electrical safety precautions when exposed to live electrical components could result in death or serious injury.

Meets cULus requirements without the need of an electrical ground connection.

 $\bigwedge$  Provide overload protection and disconnect as required.

Actuators may also be powered by DC 24 V.

Actuators may be connected in parallel if not mechanically linked. Power consumption and input impedance must be observed.
