## 🔀 INSTALLATION NOTES

- (A) Actuators with appliance cables are numbered.
- $\Lambda$  Provide overload protection and disconnect as required.
- Actuators may also be powered by DC 24 V.

Two built-in auxiliary switches (2x SPDT), for end position indication, interlock control, fan startup, etc.

- Actuators may be powered in parallel. Power consumption must be observed.
- A Parallel wiring required for piggy-back applications.

Apply only AC line voltage or only UL-Class 2 voltage to the terminals of auxiliary switches. Mixed or combined operation of line voltage/safety extra low voltage is not allowed.

Meets cULus requirements without the need of an electrical ground connection.
