## Electrical installation

## $\not \subset$ INSTALLATION NOTES

A Actuators with appliance cables are numbered.
(UP) Universal Power Supply (UP) models can be supplied with 24 VAC up to 240 VAC, or 24 VDC up to 125 VDC.

4Provide overload protection and disconnect as required.

$\triangle$Two built-in auxiliary switches ( $2 \times$ SPDT), for end position indication, interlock control, fan startup, etc.
45 Actuators may be powered in parallel. Power consumption must be observed.
48 Parallel wiring required for piggy-back applications.
A Apply only AC line voltage or only UL-Class 2 voltage to the terminals of auxiliary switches. Mixed or combined operation of line voltage/safety extra low voltage is not allowed.
Meets cULus requirements without the need of an electrical ground connection.
Warning! Live electrical components!
During installation, testing, servicing and troubleshooting of this product, it may be necessary to work with live electrical components. Have a qualified licensed electrician or other individual who has been properly trained in handling live electrical components perform these tasks. Failure to follow all electrical safety precautions when exposed to live electrical components could result in death or serious injury.
