| Product features | | | | | |
| Application | This valve is typically used on fan coil units, baseboards or other hydronic applications where fail safe operation on 2-wire control is required. This valve is suitable for use in a hydronic system with variable or constant flow. | | | | |
| | This valve is designed to fit in compact areas where on/off or control is required using 24 VAC or 120 VAC. | | | | |

Electrical installation

X INSTALLATION NOTES

Meets cULus requirements without the need of an electrical ground connection.
