

COMFORT AT FIRST SWIPE

From commissioning to comfort, one thermostat feels right with every swipe:
The Honeywell TC300 Commercial Thermostat

Honeywell TC300
Commercial Thermostat

Honeywell

PROFESSIONAL CAPABILITIES THAT PUT EVERYONE AT EASE

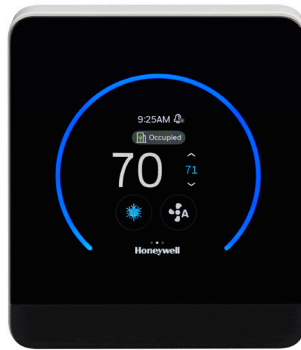

Delight your occupants with a thermostat that's lovely to behold, simple to use, and smart at adapting to their comfort preferences.

With hundreds of hours of testing, our latest commercial thermostat is designed to make everyone's day easier – from fast, guided setup, to connected facility-wide oversight and control.

CONVENIENT FOR USERS

Give occupants "déjà view" with a swipeable color touchscreen that works like the mobile devices they already know.

- Captivating glass display that belongs on the wall
- Simple screens and icons with a colorful status ring
- Customize what the display shows when inactive

Honeywell TC300 Commercial Thermostat

EASY FOR CONTRACTORS

Designed for simple installation with fewer callbacks.

- Guided setup built into device, minimizing need for configuration training or user manuals
- System status and service mode functions enable faster diagnostics and commissioning
- Niagara tool enables fast, accurate BMS integration

CONNECTED FOR FACILITY MANAGERS

Get integrated control and secure remote access to manage your facility more efficiently.

- Configurable user types and privileges
- Improve energy management by preventing unauthorized overrides
- Respond more efficiently to hot/cold calls with remote connected capabilities
- Save time and energy use with remote scheduling and synchronization
- 5-year Honeywell warranty

PRECISE FAN COIL CONTROL

Flexible configurations for nearly every 2-pipe and 4-pipe fan coil application.

- Hybrid changeover mode ensures greater comfort for 2-pipe systems during system transitions
- On/off, floating, modulating, or 6-way valves
- Multi-speed or variable speed fan
- Energy saving supply-air temperature control using ASHRAE guidelines¹
- Dehumidification with reheat option
- Building automation integration via BACnet® MS/TP or MODBUS

¹ ASHRAE Guideline 36-2021: High-Performance Sequences of Operation for HVAC Systems
